# Veekas Shrivastava

Software Engineer | **VeekasMeansProgress.com** | *This resume was ~~built~~ deliberately overengineered with React* 🎧

## + PROJECTS

**Open Source Contributor (React, Sequelize)** 🎧        Javascript, React, Jest, Git, Github

**CodeMode** 📺        Javascript, React, Redux, Google Chrome API, HTML/CSS, Express, Sequelize
Chrome extension to convert Youtube videos into an interactive learning platform
- Worked in an agile team of four over two weeks to create our first extension
- Implemented UI/UX design and drawer functionality
- Full-featured: used content scripts, background processes, and a popup

**Audelio** 🎧        Javascript, React, Redux, Python, Express, Sequelize
Podcast player and recommendation engine (in development)

**Use Strict Everywhere** ⊞        Typescript, VSCode API
Visual Studio Code extension that converts a workspace to strict mode
- Learned VSCode API, implemented, and deployed over a few days
- Currently offered in the VSCode extension marketplace with over 40 downloads

**Easy Form to PDF** 🎧        Javascript, React, Redux, Draft.js, HTML/CSS, Express, Sequelize
User-friendly Draft.js form that generates a PDF from inputs
- Real-world project for Hopelink, a Seattle-based United Way affiliate
- Sole developer for form that implements Draft.js and Formik

**Pokeball** ↗        Javascript, React, Redux, Express, Sequelize
A fully-developed mock e-commerce site selling Pokemon
- Worked in agile team to implement e-commerce website over 1 week
- Contributions included full stack navigation, auth. functionality, and UI
