Veekas Ashoka

Senior Software Engineer | **VeekasMeansProgress.com**
This resume was ~~written~~ deliberately over-engineered in React ⌨

+ PROFESSIONAL EXPERIENCE

Arcadia Power
Software Engineer III

New York, NY
July 2022–Present

- Contributed to ongoing development of front-end infrastructure such as the React component library ↗
- Worked to consolidate three brands to one Next.js marketing site while performing major upgrades to the site's dependencies
- Re-platformed automated emails to a custom-built solution ingesting Salesforce events through AWS & consuming via a Ruby on Rails server with GraphQL
- Helped develop an internationalization strategy for the company's marketing sites
- Developed a strategy for working with non-technical stakeholders to improve accessibility measures

The Knot
Software Engineer - Core Systems

New York, NY
Jan 2020-June 2022

- Co-maintained the company's shared frontend UI/UX framework ↗
- Led development on full redesigns of the following: global navigation/header, layout & grid system, buttons, links, & inline alerts
- Transitioned the company's shared UI/UX framework from CircleCI to Jenkins Pipelines
- Helped build an internal A/B testing service & REST API (Node/Express) to manage experiments & user bucketing across brands
- Built a targeted build tool for our large monorepo using Rust
- Re-platformed & redesigned docs to use Storybook
- Implemented accessibility updates to foundational components used on all pages, e.g. headers, forms, & buttons (WCAG 2.0)
- Member of Diversity, Equity, & Inclusion Council

Software Engineer - Marketplace
Associate Software Engineer

Oct 2019-Jan 2020
May 2018-Oct 2019
